## Java Full Stack Developer

✉ ashishmeena100603@gmail.com ☎ 6378561090 📍 jaipur,india 🔗 LinkedIn 🌐 GitHub

### Summary

---

Java Full Stack Developer skilled in Java, Spring (MVC, Boot, Security), Hibernate, and front-end technologies like React and JavaScript. Proficient in building scalable web applications, RESTful APIs, and integrating front-end with back-end seamlessly.

### Skills

---

- Programming Languages: Java , C , C++
- Frontend Technologies: HTML , CSS , JavaScript, React JS , Bootstrap
- Back- End Frameworks: Spring, Spring Boot, Spring-Security, Hibernate, JPA
- Web Technologies: RESTful APIs, JSON, JWT (JSON Web Token), JSP
- Databases: MySQL , MongoDB, Redis
- Tools: Visual Studio Code, IntelliJ IDEA, Eclipse IDE, Postman, Maven, GitHub
- Soft Skills: Problem-solving, team collaboration , leadership, critical thinking, and conflict resolution.

### Professional Experience

---

#### Java Full Stack Developer (Trainee)

October 2024 – present | jaipur, India

*Global IT Providers*

- Designed and developed a blogging platform with functionalities for user authentication, post creation, editing, and category-based dynamic routing.
- Gained experience in performance tuning of software solutions using frameworks like Spring Boot, Hibernate, and React JS.
- Collaborated with cross-functional teams to design and implement scalable back-end services and APIs, focusing on performance and scalability, leading to a 25% improvement in response time for API calls.
- Utilized MySQL and MongoDB for database management, including writing optimized queries, designing schemas, and managing data relationships, resulting in a 20% reduction in database access times.
- Learned and implemented security best practices with Spring Security for authentication and authorization.

### Projects

---

#### Blog Website [🔗](#)

*Tech Stack: React, Spring Boot, MongoDB, REST APIs, Redux, JWT, React Router, firebase*

- Developed a full-stack blogging platform allowing users to create, read, update, and delete (CRUD) blog posts.
- Implemented user authentication and authorization using JWT and Spring Security for secure access.
- Designed a responsive and interactive UI using React, React Router, and Redux for state management.
- Optimized API performance with caching mechanisms ,Multithreading and pagination for better scalability
- Used MongoDB as the database, implementing indexing for faster queries and optimized performance.

#### Ecommerce Website [🔗](#)

*Tech Stack: JSP, Servlets, JSTL, Java, MySQL, JDBC, HTML, CSS ,JavaScript*

- Developed a responsive e-commerce website with features like dynamic product listings, a shopping cart, and secure checkout.
- Implemented role-based access control, ensuring secure user interactions and administrative privileges.
- Integrated session management and authentication to enhance security and prevent unauthorized access.
- Used JDBC with MySQL for efficient data storage, retrieval, and transaction management.

### Education

---

#### Bachelor of Computer Application

June 2021 – present | Noida, India

*Indira Gandhi National Open University*
